

GREGORY M. MYER

Construction Consultant - Sage Consulting Associates

EDUCATION

New Mexico State University - *Bachelor of Science* - Urban and Regional Planning with Minor in Civil Engineering

BACKGROUND

During the last 14 years, Greg Myer's work experience has focused mainly within the realm of construction serving as owner, general contractor, subcontractor, construction manager, owner's representative, and consultant. He has experience in residential, commercial, construction facilities, environmental remediation, and construction consulting in the capacity of superintendent, inspector, construction engineer, and project manager, through all phases of the construction process.

Pertinent skills obtained include scheduling and coordination of projects, review and interpretation of plans, specifications and technical data, dispute and claim settlement, problem solving, quality control, quantity verification, budget tracking, estimating, management of field crews, and the coordination and continual communication with all parties involved with each construction project.

Mr. Myer's current position with Sage Consulting Associates, Inc. consists of the oversight of completion contracts derived from the contract take over by the surety bond. The major function of the position is to manage the completion of the contracts left by the defunct contractor and protect our client from unwarranted damages or costs. Duties include researching job archives, plans and specifications, management of the completion contractor, dispute and claim settlement, review of completion contractor billings, and payment application creation.
